

Non-Comprehensive List of Technical Service Providers

The following list of organizations and companies is provided solely as a resource and does not guarantee approval or endorsement as a technical service provider. Inclusion on or exclusion from this list should not be interpreted as an assessment of an organization's qualifications or status. It is the responsibility of technical service providers, growers, and landowners to ensure compliance with the General Waste Discharge Requirements for Discharges from Irrigated Lands.

If you would like to be added to or removed from this list, please contact VCAILG at vcailg@farmbureauvc.com

For further questions or clarification, please contact the Regional Water Board at rb4-irrigatedag@waterboards.ca.gov.

Do I meet the qualifications? Can I do an MRP/MPP myself?

TSPs, growers, and landowners should review the requirements listed in the Ag Order and duplicated here. Growers and landowners may meet these requirements or a team of qualified people may need to work together to meet the requirements depending on each site and TMDL. For further questions or clarification, please contact the Regional Water Board at rb4-irrigatedag@waterboards.ca.gov.

AG Order Excerpt:

3.4.2 Certification Requirements

Farm-level MPPs must be certified by RCD or NRCS staff, or equivalent professional expert with knowledge and experience in:

1. Erosion control
2. Hydrology
3. Environmental engineering
4. Hydraulic engineering
5. Agricultural engineering

Specifically, equivalent professional experts must have knowledge and experience related to the management of constituent(s) being addressed in the farm-level MPP as follows:

1. For nutrient exceedances, equivalent professional experts shall have knowledge and experience in:
 - a. Filter strips
 - b. Tailwater recovery systems
 - c. Riparian buffers
 - d. Bioreactors
2. For historic pesticides and their degradation products, such as DDT, DDE, chlordane, and dieldrin, equivalent professional experts shall have knowledge and experience in:
 - a. Filter strips
 - b. Stormwater infiltration
 - c. Riparian buffers
 - d. Erosion control
3. For metals and current use pesticides, such as diazinon, and pyrethroids exceedances, equivalent professional experts shall have knowledge and experience in:
 - a. Filter strips
 - b. Stormwater infiltration
 - c. Riparian buffers
 - d. Erosion control
4. For bacteria exceedances, equivalent professional experts shall have knowledge and experience in:
 - a. Tailwater recovery systems
 - b. Stormwater infiltration
